SYSMAC CJ series Position Control Units

CJ1W-NC□□3

High-speed, High-precision positioning with 1, 2, or 4 axes

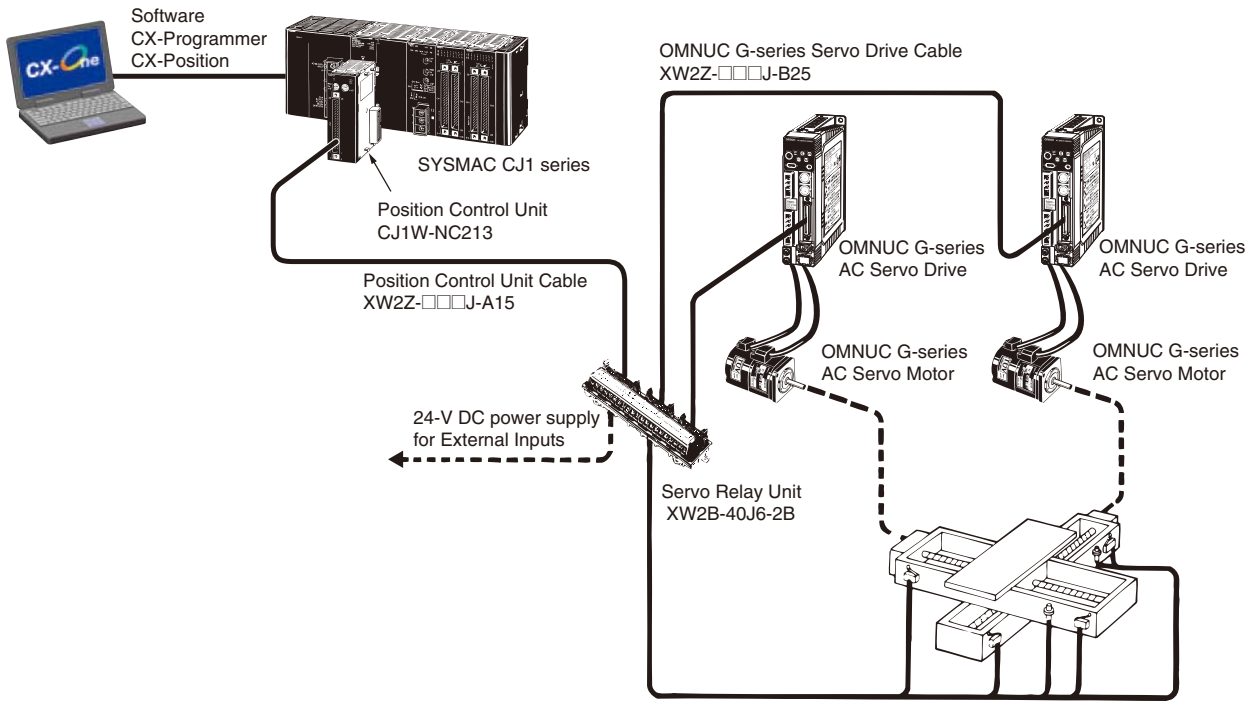
- Versatile functions and superb performance enable the construction of compact, high-performance machines.
- With its ultra-compact size of 31 × 90 mm (W × H), this highly space-efficient Position Control Unit (PCU) enables up to 4 axes of motor control.

CJ1W-NC113 CJ1W-NC213 CJ1W-NC413

Features

- Two types to choose from: open collector output and line driver. Because both open collector output and line driver types feature 1-, 2-, and 4-axis models, the most appropriate model can be selected for the application at hand.
- Positioning START occurs within 2 ms (maximum speed) after receiving a command from the Programmable Controller. (Refer to the Operation Manual for conditions.)
- High-speed data transfer is possible using INTELLIGENT I/O WRITE (IOWR) and INTELLIGENT I/O READ (IORD) instructions.
- Fine control from low to high speed (500 kpps max.) is possible in 1-pps units.
- Positioning can be done from memory, by writing an operating pattern into the PCU memory in advance. Three position patterns – Terminating, Automatic, and Continuous – can be set with completion codes to respond to a wide range of operations. Positioning of up to 100 patterns (sequential data) per one axis can be possible.
- Positioning (direct operation) can be done by direct PLC ladder commands for position data, speed data, and acceleration data. This simplifies control in situations when the target position and speed cannot be decided until immediately before operation begins, or when the target position and speed change due to other circumstances. The target position and speed can also be changed during operation.
- Interrupt feeding moves the axis a specified amount, then stops it, in accordance with an interrupt input. High-speed (0.1 ms max.) processing of the interrupt input signal ensures high-precision interrupt positioning. This helps to maximize feeder precision.
- Easy-to-Use positioning can be possible with versatile functions such as Teaching, Override, Backlash compensation, Zones, Forced interrupt and Acceleration/Deceleration curve.

System Configuration



Ordering Information

Position Control Unit

Unit type	Name	Specifications		No. of unit numbers allocated	Current consumption (A)		Model	Standards
		Control method/Control output interface	Number of control axes		5 V system	24 V system		
CJ1 Special I/O Units	Position control unit 	Open-loop control by pulse train output/ Open-collector output	1 axis	1	0.25	–	CJ1W-NC113	UC1, CE
			2 axes		0.25	–	CJ1W-NC213	
			4 axes ✻	2	0.36	–	CJ1W-NC413	
		Open-loop control by pulse train output/ Line-driver output	1 axis	1	0.25	–	CJ1W-NC133	
			2 axes		0.25	–	CJ1W-NC233	
			4 axes ✻	2	0.36	–	CJ1W-NC433	
	Space Unit	The ambient operation temperature range can be increased to 0 to 55°C if the CJ1W-SP001 CJ-series Space Unit is used.					CJ1W-SP001	UC1, CE

✻ The ambient operating temperature of the CJ1W-NC413/NC433 is 0 to50°C. Allowable power supply voltage range for external power supply is 22.8 to 25.2 V DC.

Software

Name	Specifications		Model	Standards
CX-One FA Integrated Tool Package Ver. 3	The CX-One is a package that integrates the Support Software for OMRON PLCs and components. CX-One runs on the following OS: Windows 2000 (Service Pack 3a or higher), XP or Vista CX-One Ver.3. □ includes CX-Position Ver.2. □. For details, refer to the CX-One catalog (Cat. No.R134).	1 license ✻1 CD	CXONE-AL01C-V3	–
		1 license ✻1 DVD ✻2	CXONE-AL01D-V3	

✻1. Site licenses are available for the CX-One (3, 10, 30, or 50 licenses).
✻2. When purchasing the DVD format, verify the computer model and DVD drive specifications before purchasing.

Servo Relay Unit/Cables

International Standards

- The standards indicated in the "Standards" column are those current for UL, CSA, cULus, NK, and Lloyd standards and EC Directives as of the end of September 2008. The standards are abbreviated as follows: U: UL, U1: UL (Class I Division 2 Products for Hazardous Locations), C: CSA, UC: cULus, UC1: cULus (Class I Division 2 Products for Hazardous Locations), CU: cUL, N: NK, L: Lloyd, and CE: EC Directives
- Ask your OMRON representative for the conditions under which the standards were met.

Accessories

The Position Control Unit includes the 40-pin solder-type connectors C500-CE404 (socket: Fujitsu FCN-361J040-AU, cover: Fujitsu FCN-360C040-J2).

Applicable Connectors

Name		Specifications	Model
External I/O Connectors		40 pin, soldered, right angle w/cover (included with the Unit)	C500-CE404
		40 pin, crimped right angle w/cover	C500-CE405
		40 pin, Pressure welded, w/o cover	C500-CE403
		40 pin, soldered, w/cover	C500-CE401
		40 pin, crimped w/cover	C500-CE402

Mountable Racks

✻ CJ Unit Adapter CP1W-EXT01 required.

Specifications

Basic Specifications

Item	Model		
	CJ1W-NC113/133	CJ1W-NC213/233	CJ1W-NC413/433
Power supply voltage	5 V DC (for the PCU itself)		
	24 V DC (external power supply)		
	5 V DC (external power supply; line driver output only)		
Allowable power supply voltage range	4.75 to 5.25 V DC (for the PCU itself)		
	21.6 to 26.4 V DC (external power supply)		22.8 to 25.2 V DC (external power supply)
	4.75 to 5.25 V DC (external power supply; line driver output only)		
Internal current consumption	250 mA max. at 5 V DC	250 mA max. at 5 V DC	360 mA max. at 5 V DC
Current consumption of external power supply	NC113: 30 mA max. at 24 V DC NC133: 10 mA max. at 24 V DC NC133: 60 mA max. at 5 V DC	NC213: 50 mA max. at 24 V DC NC233: 20 mA max. at 24 V DC NC233: 120 mA max. at 5 V DC	NC413: 100 mA max. at 24 V DC NC433: 30 mA max. at 24 V DC NC433: 230 mA max. at 5 V DC
External dimensions	90 (H) × 31 (W) × 65 (D) (all models)		
Weight	100 g max.	100 g max.	150 g max.
Ambient operating temperature	0 to 55°C		0 to 50°C ✻

✻ Refer to Operation Manual *3-3-5 Mounting Precaution for CJ1W-NC413/NC433* for information on the ambient operating temperature of the CJ1W-NC413/433.

Note: Specifications not listed above conform to CJ Series general specifications.

Performance Specifications

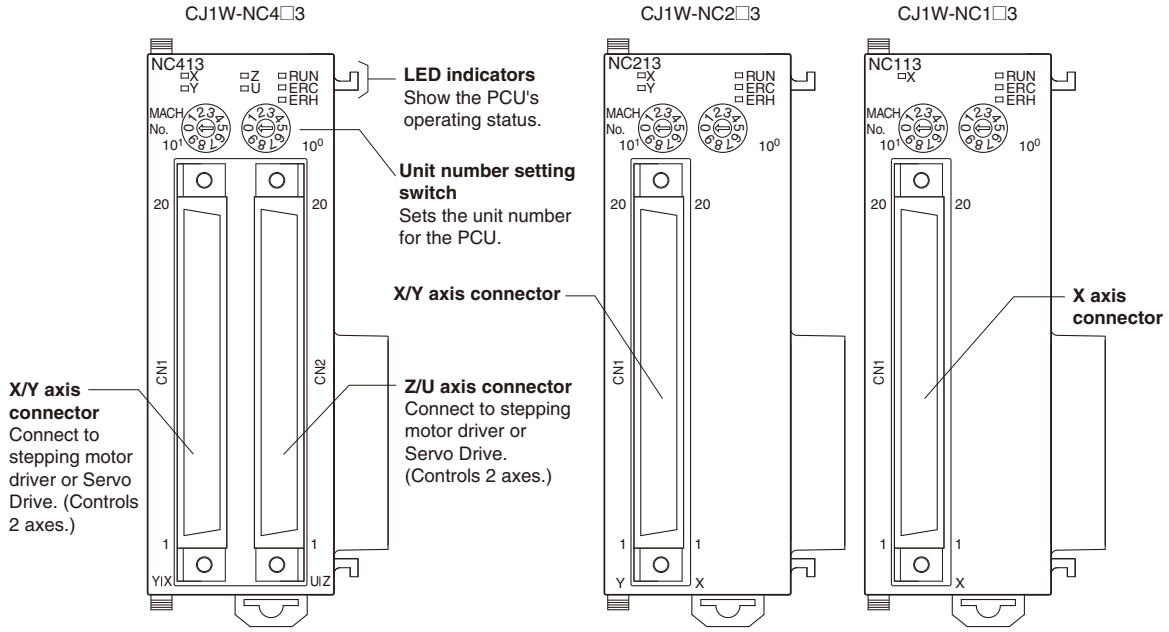
Item		Model		
		CJ1W-NC113/133	CJ1W-NC213/233	CJ1W-NC413/433
Applicable PLC models		CJ-series PLCs		
Unit type		Special I/O Unit		
I/O requirements	Words	5 words	10 words	20 words

Item		Model		
		CJ1W-NC113/133	CJ1W-NC213/233	CJ1W-NC413/433
Controlled driver		Pulse-train input-type Servo Drive or stepping motor driver NC113/213/413 models have open collector output. NC133/233/433 models have line driver output.		
Control	Control system	Open-loop control by pulse train output		
	Number of control axes	1 axis	2 axes	4 axes
Control unit		Pulse		
Positioning operations		Two types: memory operation and direct operation		
	Independent	1 axis	2 independent axes	4 independent axes
	Linear interpolation	None	2 axes max.	4 axes max.
	Speed control	1 axis	2 independent axes	4 independent axes
	Interrupt feeding	1 axis	2 independent axes	4 independent axes
Positions	Range	−1,073,741,823 to 1,073,741,823 pulses (See note.)		
	Data items	100/axis		
Speeds	Range	1 pps to 500 kpps		
	Data items	100/axis		
Acceleration and deceleration times	Range	0 to 250 s, until maximum speed is reached.		
	Data items	9/axis for acceleration and deceleration each		
Functions and settings	Origin search	Origin proximity input signal: selectable (absent, N.O. or N.C. contact). Origin input signal: selectable (N.O. or N.C. contact) Origin compensation: −1,073,741,823 to 1,073,741,823 pulses Origin search speed: High-speed or proximity-speed can be set. Origin detection method: May be set to stop upon origin input signal after proximity input signal has turned ON, to stop upon origin input signal after proximity input signal has turned OFF, to stop upon origin input signal without using proximity input signal, or to stop upon origin input signal after limit input signal has turned OFF. N.O. = Normally open N.C. = Normally closed		
	Jogging	Jogging can be executed at a specified speed.		
	Dwell times	19/axis can be set from 0 to 9.99 s (unit: 0.01 s).		
	Acceleration/ deceleration curves	Trapezoidal or S-curve (Can be set separately for each axis.)		
Functions and settings	Zones	Zone Flag turns ON when present position is within a specified zone. Three zones can be set for each axis.		
	Software limits	Can be set within a range of −1,073,741,823 to 1,073,741,823 pulses.		
	Backlash compensation	0 to 9,999 pulses. Compensation speed can also be set.		
	Teaching	With a command from the PLC, the present position can be taken as the position data.		
	Deceleration stop	The STOP command causes positioning to decelerate to a stop according to the specified deceleration time.		
	Emergency stop	Pulse outputs are stopped by an external emergency stop command.		
	Present position preset	The PRESENT POSITION PRESET command can be used to change the present position to a specified value.		
	Override	When the override enabling command is executed during positioning, the target speed is changed by applying the override coefficient. Possible to set to a value from 1 to 999% (by an increment of 1%)		
	Data saving	1) Saving to flash memory. (Can be written 100,000 times.) 2) Reading from PLC area by data reading instruction. 3) Reading by Support Software and saving to personal computer hard disk or floppy disk.		
External I/O	Inputs	Prepare the following inputs for each axis: CW and CCW limit input signals, origin proximity input signal, origin input signal, emergency stop input signal, positioning completed signal, interrupt input signal		
	Outputs	Prepare the following outputs for each axis: Pulse outputs CW/CCW pulses, pulse outputs and direction outputs can be switched. Either error counter reset or origin-adjustment command outputs can be selected depending on the mode.		
Pulse output distribution period		1-axis operation: 4 ms Linear interpolation: 8 ms		
Response time		Refer to Operation manual *Appendix A Performance Characteristics*.		
Self-diagnostic function		Flash memory check, memory loss check, CPU bus check		
Error detection function		Overtravel, CPU error, software limit over, emergency stop		

Note: 1. The additional functions supported by unit version 2.0 can be used only when the PCU is installed with a CJ1-H or CJ1M CPU Unit (either CPU Unit Ver. 2.0 or Pre-Ver. 2.0 CPU Unit). These functions cannot be used if the PCU is installed with a CJ1 CPU Unit.
For details on Unit versions, refer to *Unit Versions of CJ-series Position Control Units* on Operation manual page vi.

2. When performing linear interpolation, the distances that can be moved will vary.

External Interface



LED Indicators

Name	Color	Status	Explanation
RUN	Green	Lit	Lit during normal operation.
		Not lit	Hardware error, or PLC notified of PCU error.
ERC	Red	Lit	An error has occurred.
		Not lit	No error has occurred.
ERH	Red	Lit	An error has occurred IN the CPU Unit.
		Not lit	No error has occurred at the CPU Unit.
X	Orange	Lit	Pulses are being output to the X axis (either forward or reverse).
		Flashing	An error has occurred, such as incorrect cable type for the X axis or faulty data.
		Not lit	None of the above has occurred.
Y	Orange	Lit	Pulses are being output to the Y axis (either forward or reverse).
		Flashing	An error has occurred, such as incorrect cable type for the Y axis or faulty data.
		Not lit	None of the above has occurred.
Z	Orange	Lit	Pulses are being output to the Z axis (either forward or reverse).
		Flashing	An error has occurred, such as incorrect cable type for the Z axis or faulty data.
		Not lit	None of the above has occurred.
U	Orange	Lit	Pulses are being output to the U axis (either forward or reverse).
		Flashing	An error has occurred, such as incorrect cable type for the U axis or faulty data.
		Not lit	None of the above has occurred.

Note: 1. For the CJ1W-NC113/NC133, this applies only to the X axis; for the CJ1W-NC213/NC233, it applies only to the X and Y axes.

2. When not all of the axes are used for the CJ1W-NC213/NC233/ NC413/NC433, either connect the CW/CCW limit inputs for the unused axes to the input power supply and turn them ON or set the contact logic to N.O. Connect the emergency stop to the input common and turn it ON. If it is not connected, the ERC indicator will light. Operation will be normal, however, for all axes that are used.

Functions Supported by Each Unit Version of Position Control Unit

Unit Version		Pre-Ver. 2.0	Ver. 2.0	Ver. 2.3
Internal system software version		1.0	2.0	2.3
CJ-series Position Control Units		CJ1W-NC113/133/213/233/413/433		
Functions	Changing the acceleration for a multiple start during relative movement or absolute movement in direct operation	Not supported	Supported	Supported
	Changing acceleration/deceleration time during jog operation	Not supported	Supported	Supported
	Setting acceleration/deceleration time for axis parameters until the target speed is reached	Not supported	Supported	Supported
	Easy backup function	Not supported	Supported	Supported
	Setting number of unused axes	Not supported	Not supported	Supported
	Setting CW/CCW pulse output direction	Not supported	Not supported	Supported
	Setting origin search pattern	Not supported	Not supported	Supported
	Position data setting when origin signal stops	Not supported	Not supported	Supported
	Setting jog operation	Not supported	Not supported	Supported
	Setting deviation counter reset output signal	Not supported	Not supported	Supported
	Checking parameters and data at startup	Not supported	Not supported	Supported
Support Software		CX-Position Ver. 1.0 or later	CX-Position Ver. 1.0 (See note 2.) CX-Position Ver. 2.0 or later	CX-Position Ver. 1.0 (See note 2.) CX-Position Ver. 2.0 (See note 2.) CX-Position Ver. 2.1 (See note 2.) CX-Position Ver. 2.2 or later

Note: 1. The Position Control Unit must be installed with CJ1-H or CJ1M CPU Unit to use the above functions supported for Position Control Unit Ver. 2.0. These functions cannot be used if the Position Control Unit is installed with a CJ1 CPU Unit.
2. With CX-Position Ver. 1.0, new functions added to Position Control Units Ver. 2.0 or higher cannot be used.
3. Please refer to the Operation Manual Page vii for the Unit Version.

Connecting Connectors Using Servo Relay Units

Wiring requires the dedicated cables.
Position Control Unit Cables, Servo Relay Unit, Servo Drive Cable are sold separately.

Read and Understand This Catalog

Please read and understand this catalog before purchasing the products. Please consult your OMRON representative if you have any questions or comments.

Warranty and Limitations of Liability

WARRANTY

OMRON's exclusive warranty is that the products are free from defects in materials and workmanship for a period of one year (or other period if specified) from date of sale by OMRON.

OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, REGARDING NON-INFRINGEMENT, MERCHANTABILITY, OR FITNESS FOR PARTICULAR PURPOSE OF THE PRODUCTS. ANY BUYER OR USER ACKNOWLEDGES THAT THE BUYER OR USER ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE. OMRON DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED.

LIMITATIONS OF LIABILITY

OMRON SHALL NOT BE RESPONSIBLE FOR SPECIAL, INDIRECT, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS, OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED ON CONTRACT, WARRANTY, NEGLIGENCE, OR STRICT LIABILITY.

In no event shall responsibility of OMRON for any act exceed the individual price of the product on which liability is asserted.

IN NO EVENT SHALL OMRON BE RESPONSIBLE FOR WARRANTY, REPAIR, OR OTHER CLAIMS REGARDING THE PRODUCTS UNLESS OMRON'S ANALYSIS CONFIRMS THAT THE PRODUCTS WERE PROPERLY HANDLED, STORED, INSTALLED, AND MAINTAINED AND NOT SUBJECT TO CONTAMINATION, ABUSE, MISUSE, OR INAPPROPRIATE MODIFICATION OR REPAIR.

Application Considerations

SUITABILITY FOR USE

OMRON shall not be responsible for conformity with any standards, codes, or regulations that apply to the combination of products in the customer's application or use of the product.

At the customer's request, OMRON will provide applicable third party certification documents identifying ratings and limitations of use that apply to the products. This information by itself is not sufficient for a complete determination of the suitability of the products in combination with the end product, machine, system, or other application or use.

The following are some examples of applications for which particular attention must be given. This is not intended to be an exhaustive list of all possible uses of the products, nor is it intended to imply that the uses listed may be suitable for the products:

- Outdoor use, uses involving potential chemical contamination or electrical interference, or conditions or uses not described in this catalog.
- Nuclear energy control systems, combustion systems, railroad systems, aviation systems, medical equipment, amusement machines, vehicles, safety equipment, and installations subject to separate industry or government regulations.
- Systems, machines, and equipment that could present a risk to life or property.

Please know and observe all prohibitions of use applicable to the products.

NEVER USE THE PRODUCTS FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCT IS PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

Disclaimers

CHANGE IN SPECIFICATIONS

Product specifications and accessories may be changed at any time based on improvements and other reasons.

It is our practice to change model numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the product may be changed without any notice. When in doubt, special model numbers may be assigned to fix or establish key specifications for your application on your request. Please consult with your OMRON representative at any time to confirm actual specifications of purchased product.

DIMENSIONS AND WEIGHTS

Dimensions and weights are nominal and are not to be used for manufacturing purposes, even when tolerances are shown.

ERRORS AND OMISSIONS

The information in this catalog has been carefully checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical, or proofreading errors, or omissions.

PERFORMANCE DATA

Performance data given in this catalog is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of OMRON's test conditions, and the users must correlate it to actual application requirements. Actual performance is subject to the OMRON Warranty and Limitations of Liability.

PROGRAMMABLE PRODUCTS

OMRON shall not be responsible for the user's programming of a programmable product, or any consequence thereof.

COPYRIGHT AND COPY PERMISSION

This catalog shall not be copied for sales or promotions without permission.

This catalog is protected by copyright and is intended solely for use in conjunction with the product. Please notify us before copying or reproducing this catalog in any manner, for any other purpose. If copying or transmitting this catalog to another, please copy or transmit it in its entirety.
