

## WD 1000HPT - Soldering Station Kit

Bestellnr.:0053416699

### Soldering station, digital, 160 W, 230 V, with High-Power soldering pencil WP 120 (120 W)

The Weller microprocessor controlled WD 1M soldering station has a number of in built special functions as preset temperatures, individual settings for setback, USB connectivity, which make it ideally suited for use in production, rework and laboratory environments. The kit is equipped with the WP 120 (120 W) High Power soldering iron.

#### Top Attributes

- Microprocessorcontrolled soldering station in a modern ergonomic design for Weller soldering tools up to 150 W
- Temperature control 50°C - 450°C (150°C - 550°C with WSP 150)
- Heatingup time max. 4 sec.
- Three fixed temperatures can be assigned with the temperature buttons
- When placing the iron in the safety rest WDH 10T the power is switched OFF at once or with time delay
- Soldering tips can be changed solely by hand, no other tool needed
- Big LCD display

#### Technical Data

Display technology	LCD
Equipotential Bonding/ hard grounding explanation	Normal state
Temperatur control comment	Button
Display included & Size	Large
Display information content	High
ESD safe	Yes
Equipotential Bonding/ hard grounding	Yes
Display backlight	No
Antistatic housing	Yes
Power unit wattage	160 W
Mains supply Voltage	230 V

Power supply frequency	50 Hz
Temperature regulation	50 - 450 °C

## **Packaging information**

Shelf pack size (Units per shelf pack)	1
